TIPS:

Take each idea above and write each idea on separate 3" x 5" card. Organize in order of importance and value. Implement one at a time. Review and improve. Once mastered, re-evaluate the stack and select the next one to implement. Repeat until the stack is completed.

Voice-record the best ideas you collected and listen to your recording a dozen times or more over the next 30 days. I know sounds foolish, but it is incredibly effective. Try it.
